a)	<p>Natural Gas pipeline proposed</p> <p>1) Based on desktop study, 2 routes have been identified for the proposed pipeline:</p> <p>a) Route-1: Ennore – Nellore – Guntur - Suryapet</p> <p>b) Route-2: Ennore – Chittoor – Kurnool - Nalgonda - Suryapet</p> <p>It is pertinent to mention that current gas demand on both the pipeline routes is primarily CGD demand. On account of a few proposed industrial customers (i.e. Indosol & BPCL refinery) on Route-1, this route may be preferred over the alternative i.e. Route-2.</p> <p>Furthermore, it is proposed to terminate the pipeline at Mallavaram instead of Suryapet. This will result in additional gas source for Mallavaram – Srikakulam Natural Gas Pipeline (PNGRB Bid No. BID/NGPL/22/2024/03/MSPL dated 13.12.2024).</p> <p>Also, connectivity of the proposed pipeline with East West pipeline at appropriate location to be retained for injection of gas into Mallavaram-Bhopal-Bhilwara-Vijaipur (MBBVPL) & East-West natural gas pipelines.</p> <p>2) In case it is decided to lay pipeline along Route-2, Thiruvallur (i.e. SV-103 of IOCL's ETBPNMTPL) may be considered the originating point of the proposed pipeline instead of Ennore LNG terminal.</p> <p>Also, the pressure levels required at termination point i.e. Suryapet (CS-03 of PIL's EWPL) for injection into EWPL may be communicated.</p>
