Kind attention:

Mr. Tanveer Akhtar,  
Director -Authorization,  
Petroleum and Natural Gas Regulatory Board,  
NBCC World Trade Center,  
Nauroji Nagar,  
New Delhi.

Sub: Request for clearance from PNGRB for laying, building and operating of gaseous ethylene pipeline – Dedicated pipeline to Asian paints with GCPL as the main source and OPaL as the interim source.

Respected Sir,

I am hereby submitting the revised cover letter against our application for “clearance from PNGRB for laying, building and operating of gaseous ethylene pipeline – Dedicated pipeline to Asian paints with GCPL as the main source and OPaL as the interim source.” Signed by our Director Mr. Sameer Salvi.

His Contact details has also been mentioned along with his signatures for any future correspondence.

Apropos to above, we request you to consider our application for further evaluation and grant of authorization.

Tanking You,

  
Ayushi Jain,  
Manager- Corporate Affairs.

**Kind attention: Mr. Tanveer Akhtar [Director -Authorization]**

**Sub: Request for clearance from PNGRB for laying, building and operating of gaseous ethylene pipeline – Dedicated pipeline to Asian paints with GCPL as the main source and OPaL as the interim source.**

Respected Sir,

We write to you to bring to your attention about our upcoming ethylene pipeline project in Dahej, Gujarat.

APPPL - Asian Paints (Polymers) Private Limited  
GCPL – Gujarat Chemical Port Limited  
OPaL – ONGC Petro additions Limited

Asian Paints (Polymers) Private Limited (APPPL) is setting up a new facility in Dahej, Gujarat for production of VAM & VAE. APPPL's VAM & VAE is planned to be commissioned by Mar'26. Ethylene is the prime raw material required to manufacture VAM & VAE. Ethylene shall be supplied to our Dahej manufacturing facility from GCPL as the main source through an 8-inch diameter, 13 kilometer long, underground cross-country pipeline. Since the readiness of GCPL is expected by Dec'27, an interim source OPaL is identified and ethylene shall be supplied through an 8-inch diameter, 4 kilometer long, underground cross-country pipeline connecting the main ethylene pipeline from GCPL.

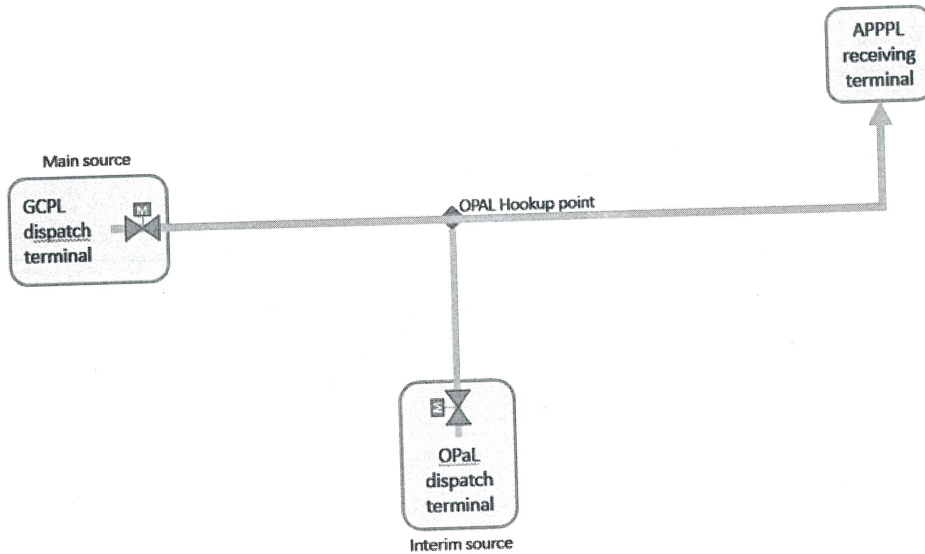

Route of this pipeline network is indicated in the attached route map along with this document.

The schematic representation with operating conditions is as indicated below,

**Pipe Specification - API 5L Grade B, PSL 1, SCH STD, Seamless, Beveled End, ASME B36.10M, 3LPE COATED**

The pipeline has been *designed* for temperature between -29 degC to 65 deg C, for pressure upto 38 bar gauge and for a maximum flow rate of 14 MT/hr.

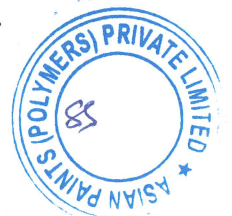

The design of the entire system is done as per OISD guidelines.

As per clause 2. (1) (i) of PNGRB notification dated 1<sup>st</sup> September 2010, it is being understood that **APPPL pipeline carrying ethylene gas** specific for Asian paints alone for the purpose of production of VAM/VAE will not fall under the category of petroleum and petroleum product pipeline as pipelines which are dedicated for supply of petroleum products to a specific consumer which are not for resale are exempted. Kindly refer below image.

(i) "petroleum and petroleum products pipeline" means any pipeline including a branch or spur lines for transport of petroleum and petroleum products and includes all connected infrastructure such as pumps, metering units, storage facilities at originating, delivery, tap off points or terminal stations and the like connected to the common carriers or contract carriers including line balancing tanks and tankage required for unabsorbed interface, essential for operating a pipeline system but excluding pipelines, which are dedicated for supply of petroleum products to a specific consumer which are not for resale:

Provided that the transporter may own, hire, outsource or use on hospitability basis such connected facilities on non discriminatory basis:

Further as per clause 19.2 of the same notification, applying to PNGRB board for the purpose of laying pipeline is applicable only for petroleum and petroleum product pipeline.
