Subject:- Intimation to lay, build & operate the dedicated 4.96 km MDPE Natural Gas Pipeline to meet our requirement and not for resale ; to evacuate Domestic Gas from small/isolated fields from ONGC's Nomination block's isolated wells Padra 149 & 93 ,Vadodara under CAMBAY asset (gas source) to Kailash Energy Solutions' greenfield manufacturing plant at S. No. 1076/77, Village: Amla, Ta:Padra, Dist: Vadodara, Gujarat 391440

Ref:- Policy no. L-16016/2/2011-GP dated 8th July, 2013 of MoPNG, Government of India for Allocation of Domestic Gas from small/isolated fields; and Section 2 (d), 2(i), 2(j) of the PNGRB Act 2006 and Sections 2(f)(i) and 19(2) of G.S.R. 340(E), the PNGRB Regulations 2008 to lay, build & operate the dedicated 4.96 km MDPE Natural Gas Pipeline.

Dear Sir/Madam,

We would like to introduce ourselves as Kailash Energy Solutions, Ahmedabad as manufacturer of Ceramic Glaze & frit products.

As you may be aware that in order to monetize and make available scarce natural resources specifically natural gas and in order to minimize import dependence of energy and fulfil the vision of Honourable Prime Minister of India, ONGC is making efforts to explore and allocate Natural Gas from **small isolated fields on as is where is basis** to the all the interested successful bidders. Accordingly the ONGC as per the guidelines of MoPNG invited open tender from all interested bidders including existing & prospective gas suppliers, distributors (CGD Entities) & consumers.

We have participated in above mentioned tender & were sole bidder despite of multiple extension of tender due date and in the competitive bidding process, we have emerged as successful bidder and ONGC has allocated 5500 SCMD & 3500 SCMD gas from ONGC's, Padra 149 & Padra 93 well respectively **to meet our requirement at our proposed greenfield plant at village: Amla, Ta:Padra Dist: Vadodara and not for resale;**

As per the GoI's subject policy of evacuating natural gas in a time bound manner, we are required to lay the dedicated pipeline of about 4.96 km and other required infrastructure at our own expense from ONGC's Padra well 149 & 93 to our premises. We wish to reiterate that it would be a **dedicated pipeline laid to transport natural gas to our above-mentioned plant alone (a specific customer) to meet our requirement and not for resale.**

ONGC Padra's isolated wells no. 149 & 93 is expected to deliver wet gas (containing slug, condensate liquid, heavy hydrocarbons) on fall back and as is where is basis from it's marginal & isolated field having delivery pressure of approx. 1 Bar and hence MDPE pipeline is suitable to be constructed. The gas supply from this isolated field is expected to continue for a period of approximate 5(Five) years from the start date. The gas is specifically allocated to us for use at our production facilities and not

K.M. Datta

for "resale". We would also like to inform that as per best of our knowledge there is no CGD network available in the nearby vicinity of 8-10 km of our proposed manufacturing plant as on date.

We are obligated to evacuate the allocated gas on or before 23rd May,2024 and are carrying obligation of take or pay charges apart from National loss of flaring off precious Natural Gas. Therefore, it becomes crucial from business point of view and as well as on moral grounds to make use of scarce resource of Natural Gas for economic activities and contribute to the economic well being of Nation's growth and development.

The starting point for proposed pipeline to evacuate 9000 SCMD gas allocated to us on fall back basis by ONGC from Padra well no. 149 & 93 as per the guidelines of MoPNG will act as source of natural gas supply.

The 'Delivery Point that is End Point of proposed dedicated Natural Gas pipeline from Padra well 149 & 93 to to our prposed site M/s.KAILASH ENERGY SOLUTIONS is inside our production plant at S. No. 1076/77, Village: Amla, Ta;Padra, Dist: Vadodara, Gujarat 391440

The relevant details along with Layout Drawing pertaining to the said dedicated pipeline are enclosed at Annexure- A.

We want to assure the PNGRB that the dedicated pipeline asset shall be laid complying with technical & safety norms and shall be used for the said purpose only and no resale activity shall be carried out.

We wish to most humbly submit and intimate the Hon'ble PNGRB about our requirement & intent of laying , building & operating the dedicated 4.96 km MDPE Natural Gas Pipeline from ONGC Padra well 149 & 93,Dist: Vadodara, Gujarat to our plant to evacuate Natural Gas **for own use & not for resale** in a time bound manner and provide us an acknowledgment of submission of this letter.

Should you require any further information, we will be happy to provide the same.

Thanking you,

yours sincerely,

For KAILASH ENERGY SOLUTIONS,

Authorised Signatory,

Enclosure:-

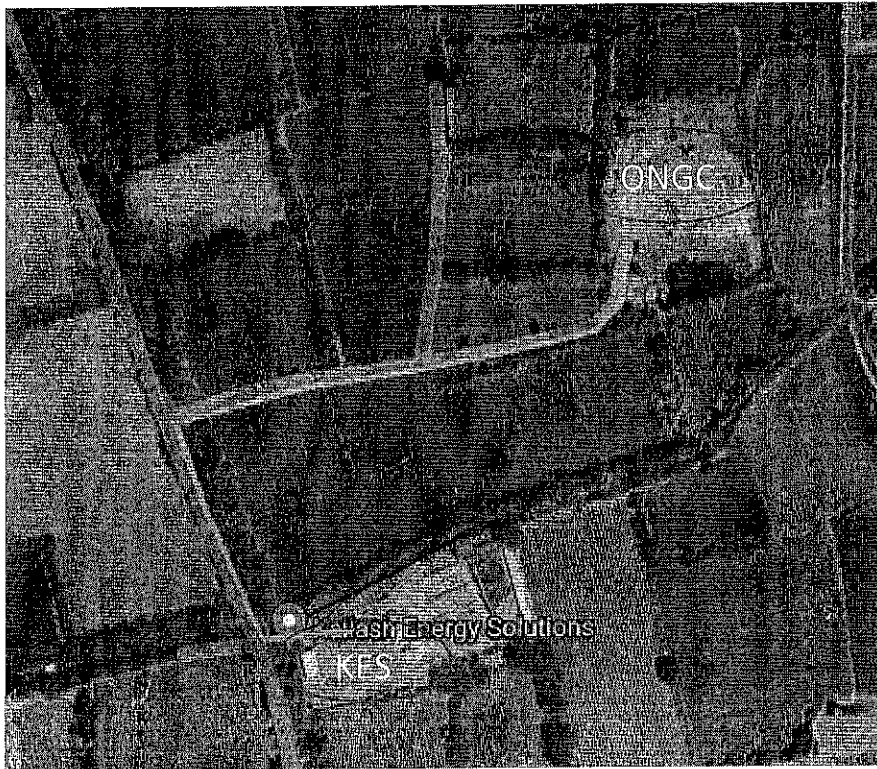

Annexure- A - Relevant details along with detailed Layout Drawing pertaining to the said dedicated pipeline.
