**Subject: Single tariff for HVJ and DBNPL/CJHPL & regarding reduction thereof**

Respected Madam,

We would like to introduce ourselves as one of the largest glass container manufacturing company in India having seven manufacturing facilities across India. One of our factory is situated at Bahadurgarh Distt Jhajjar (Haryana). We are a big user of green fuel like RLNG as we can -not use the low cost fuel like furnace oil /pet coke etc. due to ban by NGT.

We are consuming RLNG being supplied through the DBNPL/CJHPL Since we are located far away from Dahej, we are at a disadvantage in comparison with our competitors situated in the Western region as we are paying much higher multiple pipeline tariffs. The glass industry is facing several issues and it is fighting for its survival hence it is imperative to keep our cost very very competitive to survive and fuel is the largest component of our production cost. .

We are happy to hear and welcome the PNGRB initiative for combining both the tariff and make it as one consolidated tariff and also make the possible reduction into the same. Therefore, it is our humble request that any step in this regard which will reduce the tariff, shall be in the larger interest of the industry and its employees and also in the interest of ex-chequers.

Thanking You,

Yours sincerely,

For Hindusthan National Glass & industries Limited

S.R. Bansal  
Vice President
