Subject: Single tariff for HVJ and CJHPL.

Respected Sir/Madam,

We would like to introduce ourselves as one of the auto part components manufacturing company M/S. Mikuni India Pvt. Ltd. in India having manufacturing facilities across globe. One of our plant is situated at SP-2, 19A, 20 & 21A New Industrial complex, Majrakath, Neemrana, Tehsil Behror, Alwar Distt. (Rajasthan). We are a dedicated user of this green fuel natural gas / RLNG.

RLNG/NG forms a major share of our input cost. We are consuming NG/RLNG being supplied through HVJ/CJHPL pipeline, however, being located far away from Dahej, we are at a disadvantage in comparison with our competitors situated in the Western Region as we have to pay multiple pipeline tariffs. The automotive industry is facing several issues and it is fighting for its survival hence it is imperative to keep our product very competitive to survive.

We are happy to hear and welcome the PNGRB initiative for combining both the pipeline tariff and make it as one consolidated tariff, which will result in tariff reduction also. Therefore, it is our humble request that any step in this regard which will reduce the tariff, shall be in the larger interest of the industry and its employees and also in the interest of economy of the country.

Looking forward to your kind cooperation in this regard.

Thanking you,

Yours sincerely,

T. Ochiai
T. Ochiai.
Plant Head.
