Dear Madam,

Handwritten notes and signatures:
 - A signature with a date "20/06" below it.
 - The text "8/2/2019" and "SA S AACHK" written in blue ink.
 - A signature with the date "19/6" and "JA (RHS)" written below it.

This is in reference to PNGRB Public consultation Document PNGRB/M(C)/73-Vol-IV dated 03rd June 2019 on the subject matter, PIL would like to submitted the following:

- i. **Clause 4.5 Unaccounted Gas:** Un-accounted gas in the pipeline mainly occurs due to the difference in the metering of multiple entry / exit points quantities or during undertaking any maintenance work which requires the equipment or the system to be isolated and purged to depressurise and remove all hydrocarbon before it is handed over to maintenance team for work, which results in venting of gas during routine maintenance activities. This is the cost to the transporter for operating the pipeline system. PNGRB is requested to kindly allow the same in the tariff workings.
- ii. As of now there is no other specific comments to offer, however, we would like to participate in the open house, on this issue, to be conducted by PNGRB to share our views on the same.

Regards

For Pipeline Infrastructure Private Ltd.

Neeraj Pasricha
