Dear Sir,

**Sub.: Dedicated pipeline for Torrent Power Limited u/s 19(2) of "Petroleum and Natural Gas Regulatory Board (Authorizing Entities to Lay, Build, Operate or Expand Natural Gas Pipelines) Regulations, 2008"**

Torrent Power Ltd. (TPL) is an integrated power utility and one of the leading private sector power companies in India. Our operations are in generation, transmission and distribution of power, comprising;

1. Generation : 3592 MW - Natural Gas, Coal, Solar and wind based
2. Transmission : 964 ckt. Kms Network
3. Distribution : serving approx. 3 Million consumers with one of the lowest T&D losses in India

Audited consolidated data for last four financial years of TPL are as follows:

Rs. In Crores

Details	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	Unaudited 9 months December 2017
Turnover	8,681	10,396	11,687	10,054	8427
PAT	108	363	867	430	656

A substantial part of TPL's generation capacity is gas based (i.e. 2730 MW or 76%) divided between 2 power stations as under;

- a) 1530 MW SUGEN Mega Power Plant ("Sugen", near Surat, Gujarat)
- b) 1200 MW DGEN Mega Power Plant ("Dgen", at Dahej, Gujarat)

The total requirement of natural gas for TPL is around 11 MMSCMD when all its units are running at full capacity.

There is limited availability of domestic natural gas in the country and such domestic gas gets allocated to different sectors as per Government of India guidelines. Gas based Power Plants are accorded lower priority as compared to City Gas Distribution, plants providing inputs for strategic sectors, LPG Plants, and Gas based Urea plants.
