Dear Sir,

We would like to bring the following concern which may arise in moving from existing tariff regime to the proposed unified tariff.

1. Our unit is involved in Manufacturing of Man Made Fibres Yarn, located at SP- 147 Riico Industrial Area, Bhiwadi – 301019, Distt.- Alwar (Rajasthan) The proposed unified tariff will increase the tariff substantially
2. Earlier, there was a proposal of integration of HVJ and Chainsa Jhajjar pipeline for reduction of existing pipeline tariff. The current proposal is going the increase the tariff and it will impact our business substantially leading to unviability of our operation.
3. We are in to textile business which is very labor intensive. The margin is also very thin. The implementation of new tariff may jeopardize employment of many workers as it will lead to unsustainable operation.
4. We are already struggling with the outcomes of CoVID – 19 pandemic. Our profits has already affected. There is no certainty in the gas price itself. With the variable tariff structure, it is going to add further uncertainty which will impact us heavily.

We request you not to implement this kind of variable weighted average tariff mechanism as it will adversely affect us.

Thanking you,

Yours faithfully

For APM Industries Ltd.
